TASHA SHEIPLINE, *Director of Adult Education Programs* ~

Jodi Wireman, long-time Adult Education employee has been named Coordinator of the Aspire – ABLE/GED/ESOL program. Jodi served 13 years as an instructor and three years as Assistant Coordinator of the program. She steps in for the retiring Joyce Tracy. Jodi received her Master of Education from Ohio State University, Lima and recently completed a two-year leadership program and was awarded the Leadership Excellence Academics Award.

The July and August Aspire orientations drew upwards of 65 new students between the morning and evening sessions.

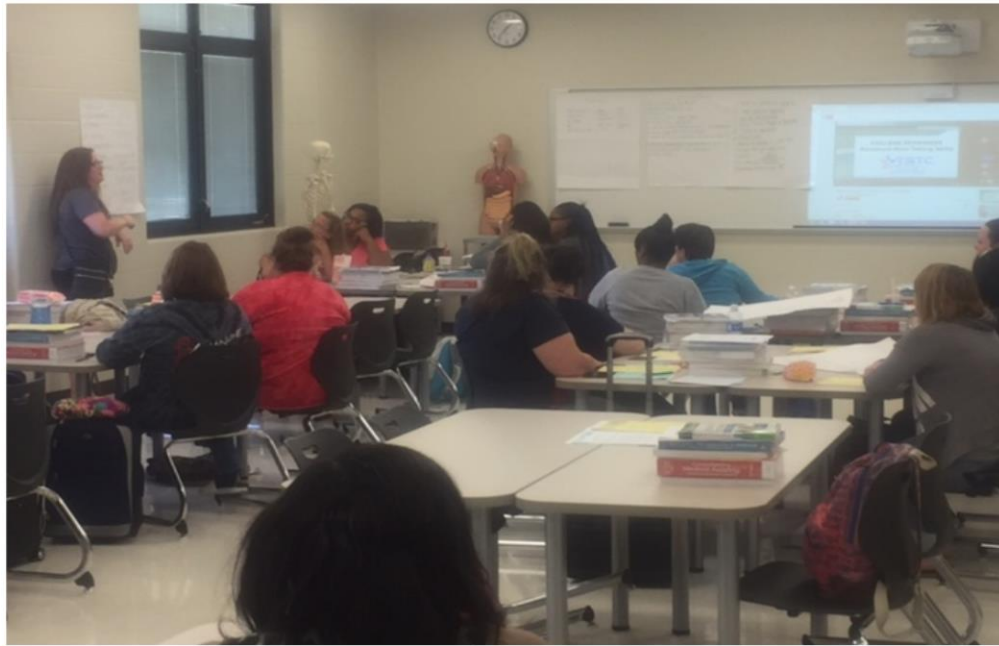

A pair of Light Construction Residential Maintenance students learn the art of masonry.

And below, they participate in their first concrete pour.

New LPN students get acquainted with their medical supplies and don their personal protective equipment!

And right down the hall, new Medical Assisting and Medical Information Specialist students undergo a full day of professional development training.

Right down the street our Early Childhood grads are making the transition to fall and seeing an influx of new, young students. Early Childhood Education classes begin September 7.

Apollo staff, family, and friends were on hand to pass out goodies to parade-goers at the Allen County Fair Parade.

ROY GILLESPIE, *Facility Manager* ~

- We have the project-landscaping contractor scheduled in September to re-seed the lawns, replace dead trees/shrubs/plants and to bring up some low areas around the buildings.
- I attended the Allen County Bus InService on August 8. These annual meetings help drivers meet the required training hours each year. This year we had a nationally known speaker Jesus Villahermosa teach on “Crisis Reality Training.” I picked up some good information about requirements schools have for written policies for conflicts on busses.
- The maintenance staff is pushing to finish a number of summer projects before the start of school. A few examples are installing decorative bollards at the entrances of Shawnee Road, installing video monitors outside the kitchen, moving the small greenhouse behind the café, wiring in trainers for the adult industrial lab, painting, installing outdoor wall lighting, etc... We also have a large list of preventative maintenance work to complete before school begins.
- This is also a busy time of year for receiving. Instructor books, supplies, tools, etc...all typically come during this time of year, and we scramble to get everything checked in and delivered to the correct locations.
- Dick and I are working with a company named CrisisGo to install a safety crisis APP on all staff and student’s phones. A few of the features are: Emergency plans are loaded and available on the APP, step by step procedures in a crisis (checklists), mass notification, administrators can share videos, panic button, GPS/maps, communication and coordination with first responders, bully and tip reporting, student rosters, and parent notification. Once we have the system up and running, we will schedule training with key personnel and then begin training staff and students.
