

June 2019

Administrative Updates

Doug Bodey
High School Director

- Thank you for all your support. I leave you with a smile on my face. I believe you are in good hands to move Apollo to the next level.

Tasha Shepline
High School Director

- Lynne Nagel and Mike Dicke will be accompanying four students to Ohio State University in July to take part in a SkillsUSA leadership camp. This is a great opportunity for career tech students to learn how to become leaders in their industries.
- An Open House for the Apollo student-built house will take place on June 16, 2019.
- Apollo Fusion will be conducting a summer call day for all incoming juniors. A group of students and staff will be calling to welcome all new incoming juniors and answer any questions they have about Apollo. This is a great way to keep new students connected over the summer.

Tara Shepherd
Adult Director

- LPN classes for the fall are almost full.
- We hosted the Ohio Polygraph Association in May. This included about 50 people who were able to receive continuing education credit.
- We have been chosen to host a regional public safety seminar in March of 2020. It had previously been hosted at UNOH. The seminar will provide continuing education opportunities to public safety professionals. Swartz Contracting is a sponsor.

Dana Dukes-Norton
District Communications Manager

- Service awards, Student Awards Assembly, Senior Honors Night and other end-of-year activities were the May focus.
- Senior Honors Night was streamed live through Facebook Live and it was successful. The video is

now archived on the website.

- The online uniform stores are nearing completion. The first store openings will be July 15 for incoming students.
 - A digital banner ad and digital billboard campaigns are currently running.
 - We are in the beginning stages of redesigning the high school website.
 - Summer projects include refreshing content in our print materials and building the marketing plan for the 2019-20 school year.
-

Nick Michel

Facility Manager

- I would like to thank the Board of Education for giving me the opportunity to serve as the new Facilities and Grounds Manager at Apollo.
 - The electric charging stations are installed and ready for use.
 - The new concrete parking spots in front of the campus are completed and available for use.
 - Maintenance is working on installing the electrical for the new diesel tank at the Truck Driving Academy.
 - Crown Equipment inspected our man lifts.
 - Painting on interior of the Fire Tower has begun.
-

Dick Schroyer

Technology Manager

- We have kicked off summer activities as of Monday, June 3. Technology Services will be working on several significant projects this summer, in addition to the normal maintenance activities – some of these include:
 - changing phone system support from TSC – Wapak to NOACSC
 - upgrading our email system server software
 - replacing our current video surveillance system(s) servers
 - converting two areas into usable classroom space
 - installing new desktop PC's in AMT, MT and CAD programs
 - replacing 125 student laptops
 - implementing an additional 75 student Chromebooks
- Technology Services worked on 135 Help Desk trouble tickets during the month of May.
